

Mounir DABIRE

49124, Angers, France — open to relocation to Île-de-France

mounirdabire47@gmail.com | Portfolio: [Mounir DABIRE](#) | LinkedIn: [W. Mounir Ménahem DABIRE](#)

AI Engineer — Python, AI Agents, MCP, RAG, LLM and Cloud; seeking a full-time position (CDI) for October 2026

TECHNICAL AND LANGUAGE SKILLS

- **Programming:** Java, Python, FastAPI, APIs, SQLAlchemy, HTML5, CSS, JavaScript, TypeScript, React, Tailwind CSS.
- **AI:** AI agents, multi-agent systems, MCP / FastMCP, RAG, embeddings, vectorisation, vector databases (Qdrant), semantic search, Hugging Face, Ollama, Prompt Engineering, OpenAI, Claude AI, Google Gemini, Mistral AI, ElevenLabs, Deepgram.
- **Big Data:** Data Lakehouse, Data Lake, Data Warehouse, batch and streaming pipelines, SQL, MariaDB, NoSQL, MongoDB, Oracle, SQL Server, SQLite, Parquet, Neon, Supabase, Apache Hadoop, Apache Spark, Apache Kafka, Dataiku, Power BI.
- **Tools:** Microsoft Office Suite, Slack, Git, PyCharm, Visual Studio Code, IntelliJ, Figma, Google Stitch, Codex, Claude Code, Antigravity, Claude Design.
- **DevOps & Cloud:** GitHub Workflows, CI/CD, Docker, Microsoft Azure (DevOps, Web App, AI Foundry), AWS, Render, LiveKit, production deployment and monitoring, end-to-end testing.
- **Languages:** French (native), English (fluent, TOEIC 910/990), Mooré (native), German (beginner).

PROFESSIONAL EXPERIENCE

AI Developer

April 2026 - Present

ESSCA School of Management, Angers, France

- **Production Agent Platform:** Feature development and maintenance of the conversational RAG agent ecosystem delivered during the final year project.
- **Monitoring & Operations:** Tracking of the agents created, support to teachers through the indexing of their materials and the creation of their agents, incident response on production agents.
- **LLM Integration:** Deployment, orchestration and maintenance of proprietary (OpenAI, Claude) and open-source models; responsive interfaces in React and Tailwind CSS.
- **Cloud & MLOps:** Industrialization and secure deployment of AI solutions on Azure infrastructure.

FullStack AI Developer - Final Year Project (PFE)

September 2025 - February 2026

ESSCA School of Management, Angers, France

- **AI Architecture:** Conversational RAG agent ecosystem delivered to production and used by teachers and students alike: teachers index their course materials to derive their own agents, which can be enabled and disabled on demand.
- **FullStack Development:** Access application for the deployed agents and responsive user interface in React from Figma mockups.
- **Cloud & Integration:** Secure deployment on Azure infrastructure and interfacing the solution with internal platforms.

Developer Intern - Development and maintenance of internal applications

April - July 2025

ESSCA School of Management, Angers, France

- Update and deployment of a conversational agent.
- Development and deployment of an AI-powered HR directory for natural language information retrieval.

Data Engineer Intern - Study and design of a data lakehouse for CDR data exploitation

June - August 2024

Moov Africa Burkina, Ouagadougou, Burkina Faso

- Data Lakehouse architecture selected for the exploitation of CDR (Call Detail Records) data, following a comparative study of Data Warehouse / Data Lake / Data Lakehouse and a static simulation on Open Source data.
- Integration of CDR data and dynamic simulation with continuous stream storage of up to 3 parallel streams (streaming).

PERSONAL PROJECTS

UrdWell — Long-term memory MCP server for AI agents

June 2026

Open-source server (Apache-2.0) allowing AI agents to retain and retrieve context across multiple sessions. Complementing vector search (classic cosine similarity) with BM25 fused through RRF raised top-1 recall from 0.55 to 0.60 across 419 LongMemEval questions, a gain of 5.3 points; reusing the stores cut the full evaluation run from 60 h to 8.8 h. One-line installer wiring the server into 8 coding agents. *Python, MCP, ONNX embeddings, Parquet, end-to-end testing.*

Grant Copilot — AI Agent for grant research

July 2026

Slack agent built for the Slack Agent Builder Challenge (Agent for Good track): searches federal grants on live Grants.gov data through a custom FastMCP server, pre-screens opportunities with deterministic filters kept outside the model's control, tracks applications and produces drafts submitted for human review, with every result cited back to its official record. *Python, Slack Bolt, MCP/FastMCP, Mistral Small, SQLite, APScheduler, deployed on Render.*

ADQUA — Smart job search tool

2026

Self-hosted tool extracting skills from a PDF resume, scraping job offers from career websites and ranking them locally based on semantic relevance. *Python, NLP, local embeddings, semantic search, web scraping, Docker Compose.*

ChartMind — Cross-platform decision-support application

Ongoing

Web and mobile financial market analysis application (Forex, stocks and cryptocurrencies), integrating Mistral AI to support technical analysis. *React, Mobile, Mistral AI, product design.*

EDUCATION

ESAIP, Engineering School, France

2022 – 2026

Engineering Degree (English track) *Specialization: Big Data*

RWU, Ravensburg-Weingarten University of Applied Sciences, Ravensburg, Germany

September 2024 – February 2025

ERASMUS Exchange Program

KTU, Kaunas University of Technology, Kaunas, Lithuania

January 2023 – June 2023

ERASMUS Exchange Program
